

Lee-Lueng Fu

Jet Propulsion Laboratory, California Institute of Technology

Lee-Lueng Fu is a senior research scientist at the Jet Propulsion Laboratory of California Institute of Technology. His research interests are to observe the physical state of the ocean from space and study its variability in relation to climate change. He obtained a B.S. degree in physics from National Taiwan University and a Ph.D. in oceanography from Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. Since 1988, he has been the Project Scientist for the series of ocean altimeter missions of TOPEX/Poseidon, Jason-1, and Jason-2, leading international science teams to study global ocean circulation and sea level change. For these accomplishments, he was awarded the American Meteorological Society's Verner E. Suomi Award. He is a Fellow of the American Geophysical Union and the American Meteorological Society, and a member of the National Academy of Engineering.
